

**RECOGNITION CASES
FOR INTERNET SUBMISSION OF
2011-12 P11D AND P11D (b) INFORMATION**

Introduction

Once you have completed your own thorough product testing you can apply for Internet Recognition for your PAYE P11D/P11D (b) Internet submission product. The scenarios contained in this pack are to be used when creating your final XML examples when applying for Internet Recognition for your software product.

Recognition “light”

*Developers who achieved recognition for 2010-11 are now only required to send in the xml for Scenario 1. Developers applying for recognition for the first time are asked to submit xml for **all** the scenarios or, if preferred, the multiple submission described at section 1.10 only.* All the scenarios must be actioned and successfully submitted to VSIPS in order to gain Internet Recognition. The URL for VSIPS is <https://secure.dev.gateway.gov.uk/submission>

To gain Internet Recognition for the P11D/P11D (b)

Once you have generated the XML for the scenarios and ensured they submit successfully to VSIPS, you should then send the XML files via email to the Software Developers Support Team at sdsteam@hmrc.gsi.gov.uk

The SDS Team will examine the XML to ensure that the product is capable of sending P11D/P11Db data over the Internet to HMRC and, if successful, your product will be granted Internet Recognition for 2011-12.

You will also need to provide a sample of your XML for the following messages in accordance with the UK Online Document Submission Protocol (**Developers new to recognition only. Previously recognised developers are not required to prove Gateway connectivity**).

- ♦ **submit_poll**
- ♦ **delete_request**
- ♦ **list_request** (where supported)

Will you also supply a sample of a **submission_response** from the Government Gateway showing successful validation of one of your XML files.

Instructions for using the Recognition Data

This section describes how the recognition data should be used by software developers. You should report any problems you experience with the Scenarios to the Software Developers Support Team – contact details <http://www.hmrc.gov.uk/ebu/sdscontact.htm>

The recognition cases provided in this document should be used to generate P11D, P11D(b) and if appropriate P11D(b) adjustments data.

It should be noted that in order for the P11Ds to pass the validations it is necessary to include the relevant P11D(b) (summary information). The P11D(b) must contain cumulative totals for all P11Ds within the submission. This will need to include completed fields for Total Benefits and NIC Payable and involves the following calculations: -

- Sum of all Cash Equivalent Figures for all Class 1A Contributions (as shown on the P11D), which then gives the TOTAL BENEFIT figure.
- Class 1A NIC percentage rate of Total Benefit (currently 13.8% for 2011-12) which then gives the NIC PAYABLE figure. This figure should be rounded to 2 decimal places.

Please note:

- The interest on loans should be calculated using the **normal averaging method**.

Conditions of Use

This recognition data is to be used primarily to ensure that software packages can produce correct XML instances using the basic data provided. Successful submission of these recognition cases over the Internet will result in HMRC Internet recognition for your product but does not constitute any form of HMRC approval of the Payroll Product itself.

Additional Information

The data contained in the Scenarios and the resulting XML generated only demonstrates a small selection of P11D/P11D(b) data that can be sent over the Internet. Therefore, when developing your Internet enabled software product, it is **strongly recommended** that you carry out thorough product testing over and above the data provided.

- ♦ If you do not intend to apply for Recognition you can still use the Scenario data provided to assist with the development of your product. Gaining Internet recognition is optional but recommended.

Please Note

- Where a NINO requires a 'space' as the last character, this is represented as (space) in the Scenario data. Eg AB123456(space)
- If you use the ampersand (&), this character must be transmitted in escaped format i.e. & within your XML submission. There is no test-in-live functionality within EXB for 2011-12 so you should not include <TestMessage> within your EXB submissions.

Note that P11D's cannot be submitted in parts in 'live' as currently happens with EOY returns. Each scheme should submit one return only in 'live' and duplicates will be returned with an appropriate error.

Base Data

The following base data should be used within each test.

Tax Office Number	Own credentials
Tax Office Reference	Own credentials
Period End	05/04/2012
Employer Name	LARGE COMPANY & CO
Employer Address (optional)	Large Office
Large Road	
Large City	
Postcode	LC5 3FT

Ideally your product should also enable the following data to be submitted

Payroll contact	Juliet Bravo
Payroll contact Tele no	01234 456789

If your product enables the submission of Agent details please use the following data in the recognition scenario xml.

Agent ID	Y456
Agent contact name	A Simpson
Agent address	Big House 24 Big Road Bigtown Bigtownshire BT21 4XR

1.10 P11D – Multi scenario

To demonstrate the ability to file multiple P11D's in a single submission you should include all 9 scenarios detailed within one submission showing a P11D record count of 9. As described in the introduction on page 2, this scenario can be used solely to replace the individual scenarios as a means of obtaining recognition.

2 P11D(B) ADJUSTMENTS

2.1 Summary – Scenarios 1 and 2

This is optional and does not have to be supported as part of the P11D package. These scenarios contain P11D(b) data for adjustments for 3 employees. The aim is to test the transfer mechanism of submitting P11D(b)s via the Internet without generating validation errors. This source data contains a number of different types of adjustments that may be submitted by a small business. In order to create these tests please use the P11D final scenario as the basis for the P11D information.

2.2 P11D(b) – scenario 1

Added to the P11D final scenario, are the P11D(b) adjustments for:
House Expenses (amount to be added of £850), (amount not due £0.00)

2.3 P11D(b) – scenario 2

Added to the P11D final scenario, are the P11D(b) adjustments for:
(amount to be added £0.00), **Employer Childcare** (amount not due of £1450)
