

#### Note to employer

You do not have to use this form but you may find it a useful way to calculate the cash equivalent for each car made available to a director or an employee who earned at a rate of £8,500 or more a year during the year 2015 to 2016 (that is 6 April 2015 to 5 April 2016).

A separate form is needed for each car provided to the director or employee during 2015 to 2016.

Read the P11D Guide before you complete this form. It refers to paragraphs in booklet 480(2016).

The term employee is used to cover both directors and employees throughout the rest of this form.

# P11D Working Sheet 2 Car and car fuel benefit 2015 to 2016

We advise you to keep a copy of each completed Working Sheet as it could help you to deal with enquiries. You do not have to give a copy of the completed Working Sheet to the director or employee, or to your HM Revenue & Customs office. But you must fill in forms P11D and P11D(b) 'Return of Class 1A National Insurance contributions due' whether or not you use this form to calculate car and car fuel benefits.

Payroll car and car fuel benefit in future tax years to avoid completing P11D's. For more information go to www.gov.uk/guidance/paying-your-employees-expenses-and-benefits-through-your-payroll

### Calculating the appropriate percentage

The appropriate percentage depends on when the car was first registered, the type of fuel used and whether it has an approved  $CO_2$  emissions figure.

Approved CO<sub>2</sub> emissions figure, if the car has one unrounded, for example 188

F	g/km

Enter the key letter (A or D) for the car's fuel or power type from table 1 below.

	TABLE 1
Key letter	Car type
D	Diesel cars (all Euro standards)
A	All other cars

#### **Next step**

5a

- For cars registered on or after 1 January 1998 with an approved CO<sub>2</sub> emissions figure, go to section 5a
- For cars registered on or after 1 January 1998 without an approved CO<sub>2</sub> emissions figure, go to section 5b
- For cars registered before 1 January 1998, go to section 5c

### Cars registered on or after 1 January 1998 with an approved CO<sub>2</sub> emissions figure

Approved CO<sub>2</sub> emissions figure in box F, if this exceeds the 2015 to 2016 relevant threshold of 95g/km it should be rounded down to the next lowest 5g/km, for example 188 to 185.

Using table 2 below, use the figure in box G to work out the percentage to enter in box H

- use column 1 for:
- all cars in fuel type A
- use column 2 for:
- all cars in fuel type D

#### Appropriate percentage

Go straight to section 6 – do not complete sections 5b or 5c

	TABLE 2							
CO <sub>2</sub> emissions (g/km)	Column 1 (%)	Column 2 (%)	CO <sub>2</sub> emissions (g/km)	Column 1 (%)	Column 2 (%)	CO <sub>2</sub> emissions (g/km)	Column 1 (%)	Column 2 (%)
0 to 50	5	8						
51 to 75*	9	12	130	21	24	175	30	33
76 to 94*	13	16	135	22	25	180	31	34
95	14	17	140	23	26	185	32	35
100	15	18	145	24	27	190	33	36
105	16	19	150	25	28	195	34	37
110	17	20	155	26	29	200	35	37
115	18	21	160	27	30	205	36	37
120	19	22	165	28	31	210**	37	37
125	20	23	170	29	32			

<sup>\*</sup>Unrounded

<sup>\*\*</sup>This is the maximum  $CO_2$  value for which a different percentage applies. Use this value if the figure in box G is greater than the maximum.

### 5b

### Cars registered on or after 1 January 1998 without an approved CO<sub>2</sub> emissions figure

Using table 3 below, work out the percentage to enter in box  $\boldsymbol{K}$ 

- use column 1 for:
- all cars in fuel type A
  - use column 2 for:
- all cars in fuel type D

#### Appropriate percentage

Go straight to section 6

TABLE 3					
Engine size of car (cc)	Column 1 %	Column 2 %			
0 to 1400	15	18			
1401 to 2000	25	28
