INTRODUCTION

Purpose of this Document

This document is intended to illustrate the structure, format and validation requirements necessary for the electronic filing of Expenses and Benefits forms.

The business requirements of HMRC and the demands of back-end systems drive the validation requirements.

Within this document is a listing of all data items required for the electronic equivalent of the form P11D and P11D(b).

Validation Rules for electronic EXB P11D/P11D(b) returns via the Internet Service

The following rules apply to all submissions made via the Internet:

Character Set

For the designated character set please refer to the XML schema for exact details.

All amounts are expressed in pounds and pence. The stated length for an amount field does not include the decimal point. For example for the field length 'max 5' will be shown as '999.99' or if specified in whole pounds as '999.00'.

Field Status

Mandatory indicates that the information must be supplied to comply with requirements. Optional indicates that information should be supplied depending on the case and in certain conditions.

Additional Information

Rounding

If it is 5 or less round down.

If it is 6 or more round up.

For example, if the NIC calculated was to result in:

£67.5558 the NIC payable would be £67.55, but if the NIC payable came to

£67.5568 the NIC payable would be £67.56.

Class 1A NIC's

Regulation 39 of the Social Security (Contributions) Regulations 2001 provides the same rounding rules for Class 1A NIC's as for Class 1 NICs.

Further information is available in our document NI Guidance for Software Developers, available on our web site at the following URL:
